Atal Bhujal Yojana and Its Background

Atal Bhujal Yojana (or, Atal Jal) is a groundwater management scheme launched by honourable Prime Minister Narendra Modi on the 95th birth anniversary of former Prime Minister Atal Bihari Vajpayee on 25 December 2019. The purpose of the scheme is to improve groundwater management in seven states of India, in these selected seven states Haryana is one where Atal Bhujal Yojana is being implemented by the I & WR department.

The primary objective of this Scheme is “to improve the management of groundwater resources in the water-stressed areas of the selected States”. Atal Jal is targeted at sustainable groundwater management, mainly through convergence among various on-going schemes with the active involvement of local communities and stakeholders.

Atal Bhujal Yojana (Atal Jal) aims to demonstrate community-led sustainable groundwater management that can be taken to scale. The scheme has been designed as a pilot with the principal objective of strengthening the institutional framework for Participatory Groundwater Management (PGWM). It also aims to bring about behavioural change at the community level through awareness programs and capacity building to foster sustainable groundwater management. Atal Jal is targeted at sustainable groundwater management, mainly through convergence among various ongoing schemes with the active involvement of local communities and stakeholders.

Capacity Building at Gram Panchayat Level Under Atal Bhujal Yojana

As Atal Bhujal Yojana is a scheme aimed primarily at inculcating behavioural changes among the stakeholders to facilitate judicious use of groundwater, training and capacity building have a vital role to play in ensuring its success. Capacity development activities aim to strengthen individuals, groups, institutions, organizations, or systems to make them more effective program partners.

Under this capacity building program, Yuva Mitra aims to conduct trainings in total 6 modules in each GP of 10 blocks of 3 districts (Bhiwani, Mahendergarh & Ch. Dadri). Each module has been compiled by considering the requirement of fulfilling the purpose of strengthening the community for the effective and sustainable management of groundwater.

In the 2nd quarter (April 2024 – June 2024) Yuva Mitra conducted Module 3 training in 44 GPs of Loharu Block. The targeted participants were the

1. Sarpanch/Members of Gram Panchayat
2. Gram Panchayat Officials
3. Members of Water and Sanitation Committee
4. Progressive farmers, Well owners
5. Members of SHGs, Youth Clubs, Bhujal Saheli
6. AWW, ASHA Worker, Housewives (female farmers) etc.

Module 3- “Water Game and CLART”

Water Game – Water Game is a simulation game which has played at each GP in module 3. Water Game kit includes Banner, Dice, Pouch, ID Card for participants, Photos of Crops, Small Cards of Crops, Fake Money, Sheets to enter data, and a Manual. In this game, 5 stakeholders participate from the participants present in the training. The trainer plays the game the 5 participants and other participants in the training observe the game.

CLART- It is a mobile-based application. CLART application is used to find out the lithology of any specific area. It shows lithology in different colours, each colour having a different type of lithology. Based on colours, it identifies which water recharge structure can build on the specific lithology.

Methodology

Under Atal Bhujal Yojana (ATAL JAL) schemes training and capacity building, the following approaches have been adopted to enhance the capacity of stakeholders.

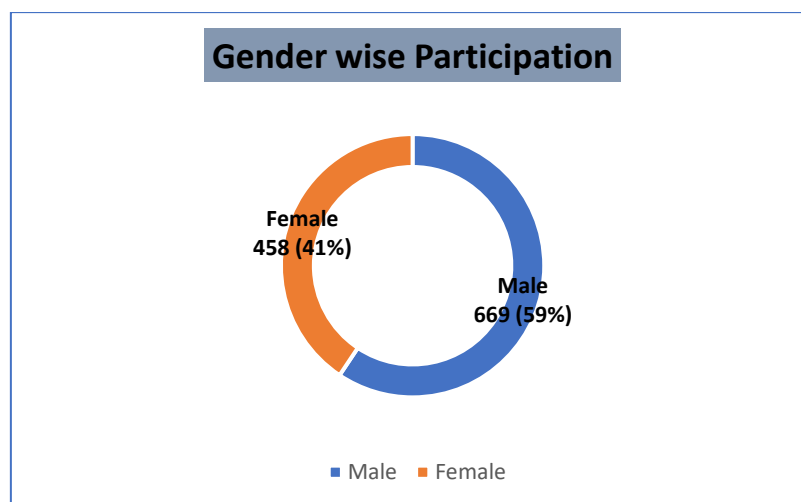

- **Training Need Assessment:** - The process begins with the Training need assessment which includes the meeting with the line departments and DPMU Experts, they suggest their valuable suggestions & inputs before conducting upcoming GP Level training. It also helped in understanding the behavioural practices of the particular area.
- **Cluster Formation:** - A cluster-based approach followed, one cluster covered 20 villages total of 25 clusters for 458 villages in 10 blocks of 3 districts.
- **Selection process:** - Selection of Trainer and assistant trainer through interview process. Choose the trainer with the highest qualifications and experience.
- **Content Development:** - Preparation of Training Modules based on the need assessment with the approval from the state-level unit (SPMU). Prepared Note Pads and Banners for more dissemination of information at the GP level.
- **Training of Trainers (TOT):** - Module-wise TOTs are conducted with the coordination of the DPMU, DIPs, and PMU team of the CB agency to strengthen the capacity, confidence, and knowledge of the team and trainers before conducting field-level training.
- **Training at GP level:** - Module-wise training was done at each GP under Atal Bhujal Yojana. Trainers had ensured the training must be interactive and participatory.
- **Monitoring and Evaluation:** - Monitoring on a regular basis of training had been done to ensure quality training and Evaluation has been done in the form of quarterly progress reports to analyse the impact of training at the community level.

Detail of Trainers engaged for GP Level Trainings in Loharu block: -

Name	Designation (Master Trainer/ Supporting Trainer)	Qualification	Mobile No.
Sunil Kumar	Master Trainer	Post Graduate	9812698933
Mir Singh	Assistant Trainer	Post Graduate	9671819834
Anita	Master Trainer	Graduate	8168710484
Umed	Assistant Trainer	Graduate	8059797464
Surender	Master Trainer	Post Graduate	9728839005
Dinesh	Assistant Trainer	Graduate	8685843717

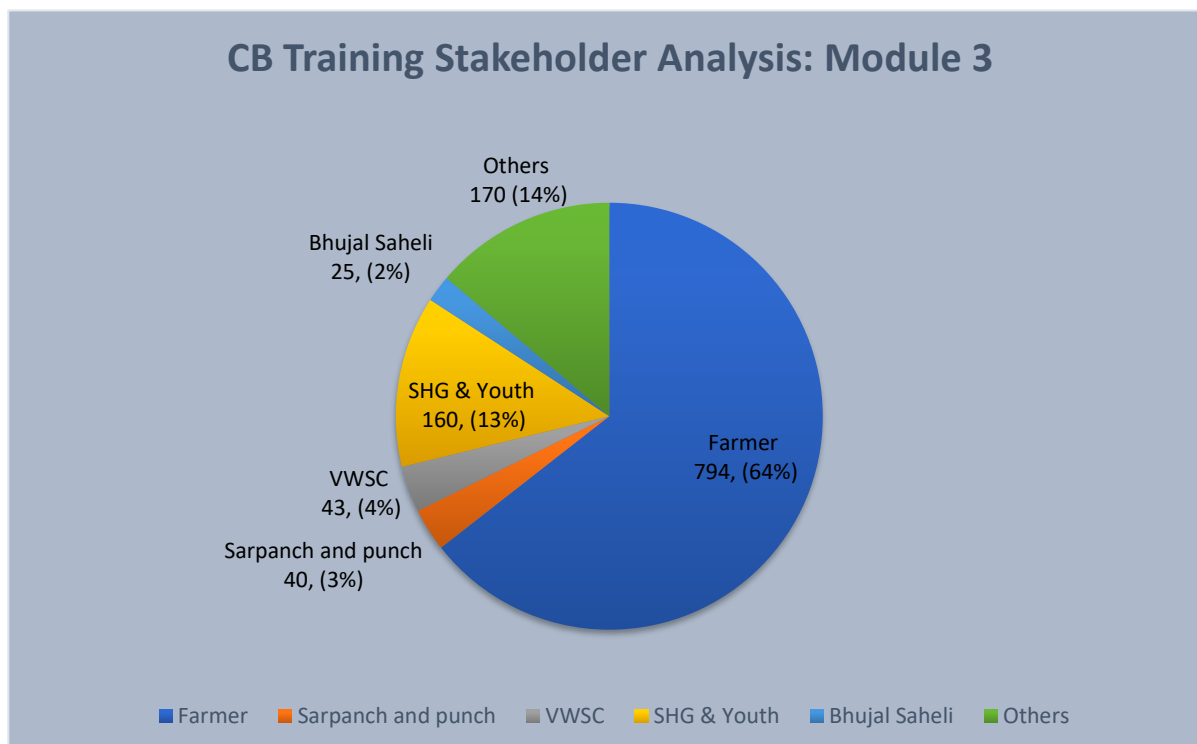

Total Trainings Conducted and Participant trained in Loharu Block during 2nd quarter (April 2024 – June 2024): -

Module	Target No. of GPs	Total Training Completed	Total Participant Trained	Male	Female
Module 3	44	44	1127	669	458

Stakeholder Analysis-: Stakeholder analysis is given below, showing the graph of stakeholder participation at the GP level training.

Stakeholder coverage of Module 3 (“Water Game and CLART”)

Conclusion

The aim of Atal Bhujal Yojana is to bring behavioural change among the stakeholders through the capacity building program. This GP level training plays a vital role in fulfilling the aim. Module 3 of the GP level training is based on the simulation game i.e., Water Game and CLART. Through this game, the trainer tried to propagate water-saving technologies and water recharge structures to manage and increase the groundwater efficiently through the efforts of the people. Also, through the CLART application people learned about the lithology and the water recharge structure built on it. This will help understand the best recharge techniques at each GP level including community participation. The stakeholders who participated in the training were so enthusiastic and engaging, they also shared their views and feedback on the training programs through videos. The GP level training disseminated awareness among various stakeholders effectively.

Total no. of GPs covered				44		
Total no. of participants trained				1125		
Total no. of training sessions conducted				88 (Per training 2 Sessions in 44 trainings of 3rd module)		

✓ Key challenges faced during the respective quarter: -

- In some villages it is difficult to get women to participate because there is no culture of men and women coming together.
- In many villages, the training hall is not available in the village as the public hall or gram panchayat hall is not suitable for sitting, so we have to take training in Anganwadi, school, sarpanch or other person's house in the village.

✓ Major learnings during the respective quarter: -

- The people of the village are already aware about Atal Bhujal Yojana and ready to gain more knowledge about the scheme as we already have done trainings in the 1st phase of training.
- In the 3rd module people learn about the demand side and supply side techniques through game and also about CLART application.
- In some villages, women participation is really appreciable, they learnt the importance of managing the groundwater data.

- Beneficiaries of Atal Bhujal Yojana also participates in trainings and motivates the other people by narrating their own benefits from the schemes.
